Service

Material Hour

Aim

Material Hour is an ideal service for people who are looking for a proactive feedback from Nordic Materials and the possibilities of new and innovative materials for general or specific projects.

We Deliver

One hour, or more, exclusively dedicated to helping you solve your material queries through the guidance and knowledge of one of our Nordic Materials staff and their access to our physical and digital resources. Available Monday to Friday 09:00 - 17:00.

The result of our investigations are delivered through digital pdf A4 sent by email to you. Minimum charged are 2 hours: 1 hour -or more- of investigation + 1 hour to report the results on A4 pdf format.

Content

Material Hours are held exclusively in Transplant's Nordic Materials center and can be booked for as many hours as required.

A member of our Nordic Materials team will take your request, search, and give you a feedback with innovative materials and processes and how they could enhance your idea or final product. Previous clients have included architects, designers and product producers.

For a deeper and more detailed insight held at a site of your choice we recommend a **Material Research**.

Example

NM (Nordic Materials), C (Client)

NM: Good morning, Nordic Materials here. How can we assist you?

C: Good morning, It's Frank from the maritime industry here. We discussed a problem i had with transporting my stock a few weeks ago. Do you have any solutions for delivering my stock by ship without it moving around in the hull?

NM: Hi Frank, yes I do. I had a look into some materials after our discussion. Tell me what exactly is the criteria for what you are looking for? Does it need to be waterproof and lightweight? What kind of price range are you looking at?

C: That's great you followed up from our chat. I'm looking for something to keep the cargo boxes steady when the cargo ship is moving around so it would need to be lightweight and waterproof. If it's a good product I'd be willing to pay up to 20€/meter

NM: I have several products in mind but, what I think would be ideal for this would be a material called Gerex.

C: What is Gerex? How much does it cost? Would you be able to order me some?

NM: yes, alternatively I could give you the contact details of the manufacturer. I think it'll take two Material Hours.

C: Ok, i agree for two Material Hours. Thanks, if you can send me the contact details that'd be best...

NM: No problem, we search for you and forward you all info about it in an email. Consider it done, have a nice day. Thanks for your confidence and you will get your Material Hours report within 6 hours in your email box.
